# ASSIGNMENT 2

**Name : Vansh Jindal**

**University roll no : 2415001735**

**Section : SB**

**Course : B tech{cse}**

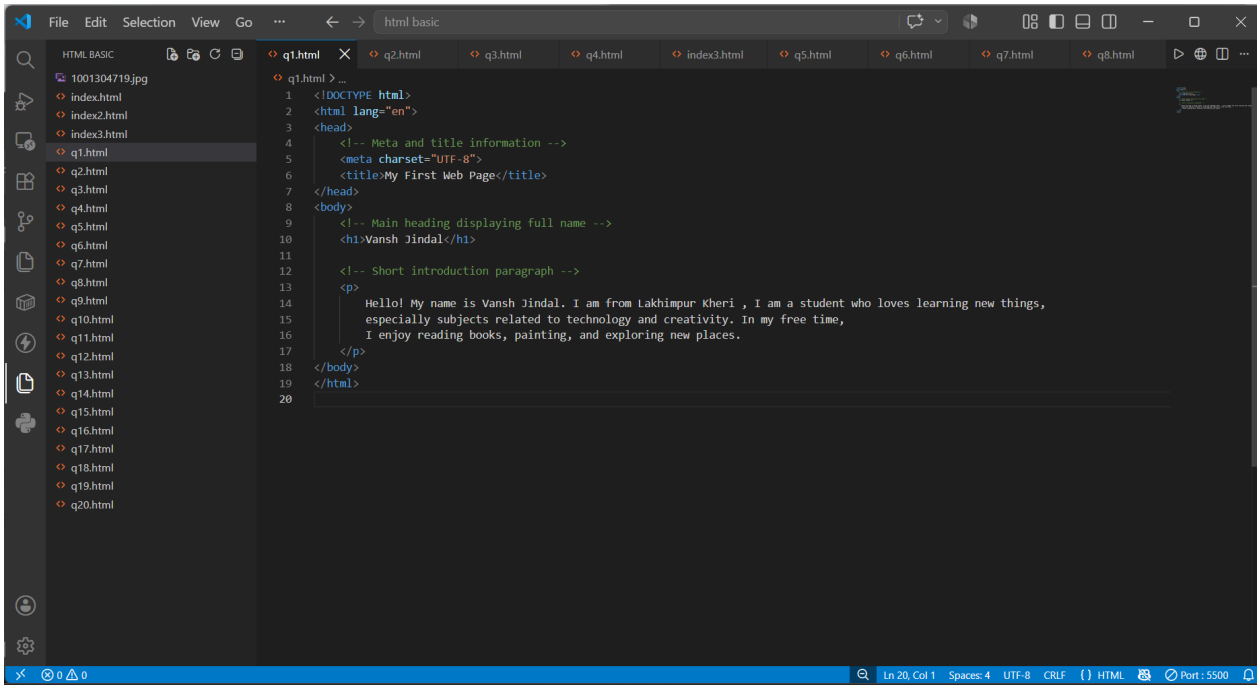

**Session : 2024-2028**

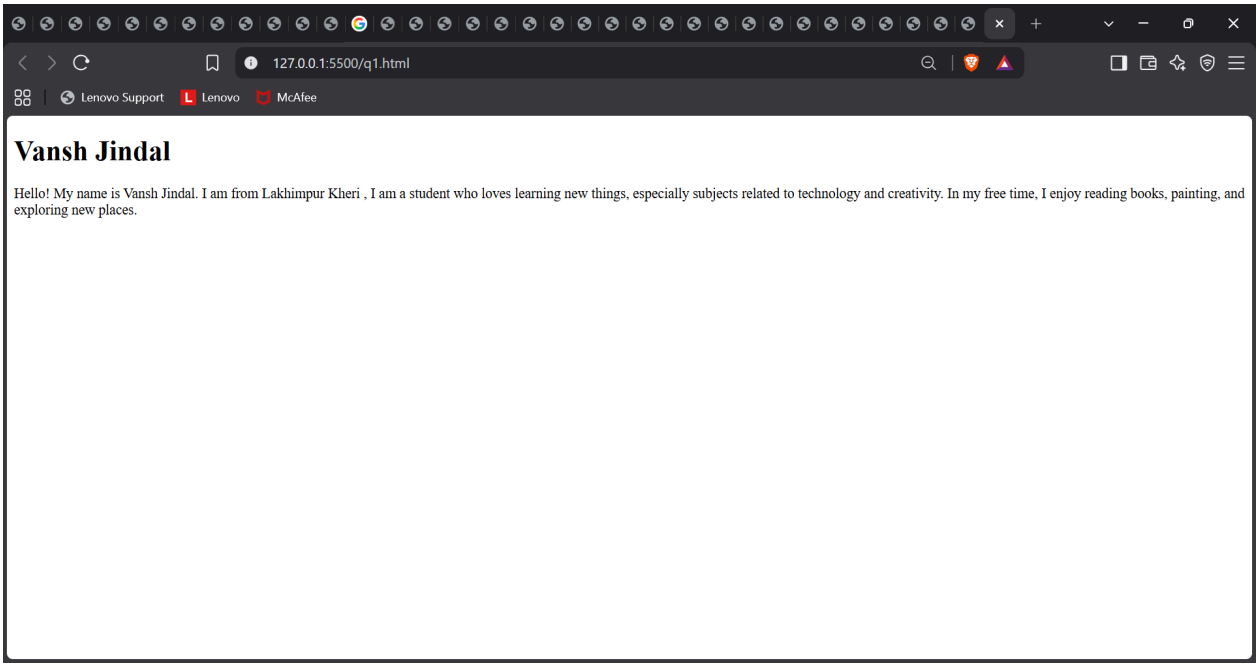

**Submitted to : Mr Akash Gupta**

**Class roll no : 63**

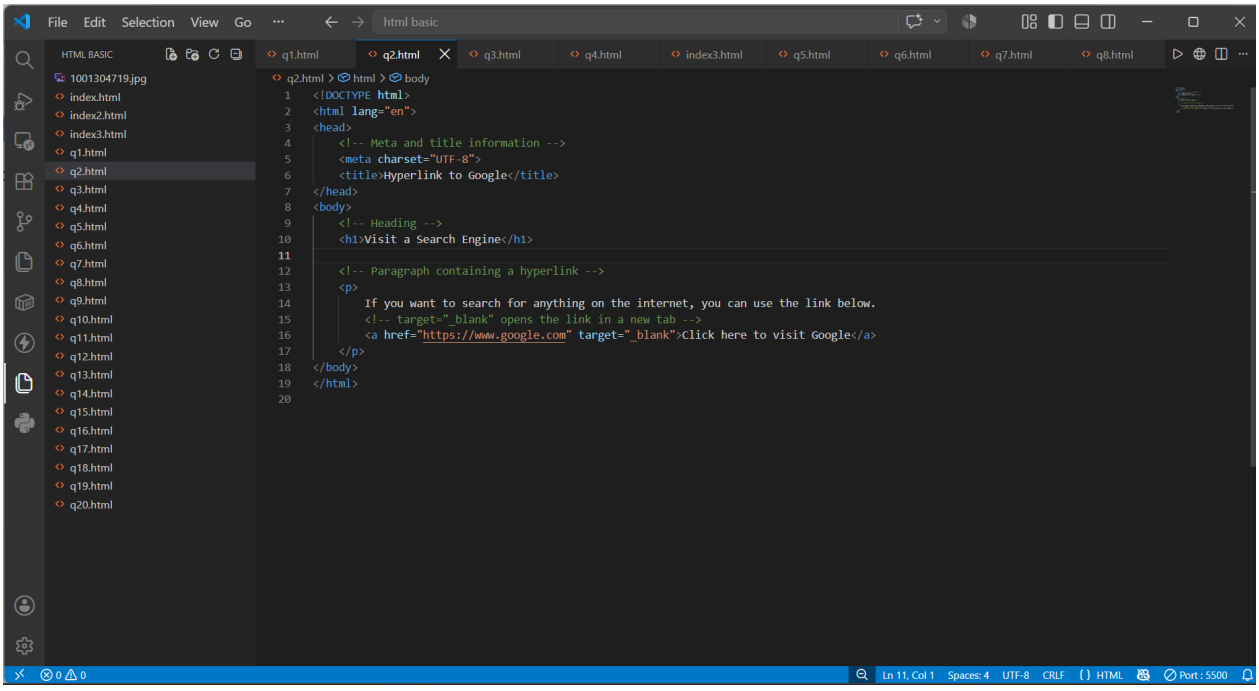

## Tasks

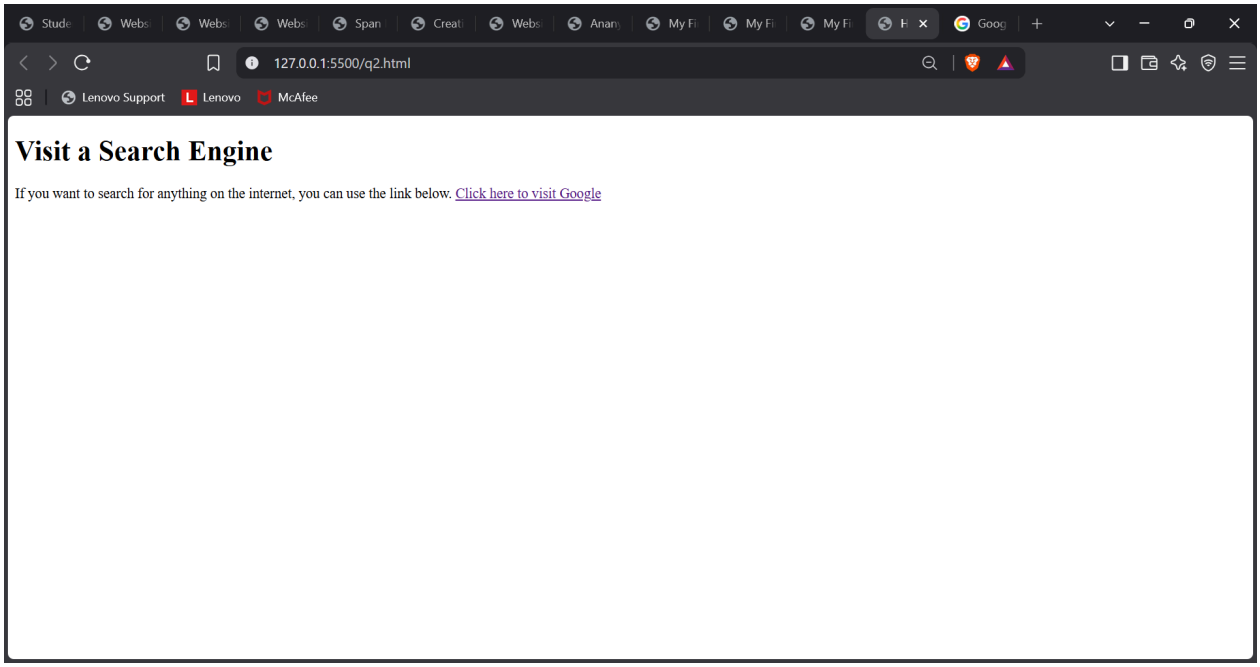

**1.** Create a basic webpage titled **“My First Web Page”**.
Inside the `<body>`, display your **full name** as a main heading (`<h1>`) and write a short **introduction paragraph** about yourself.

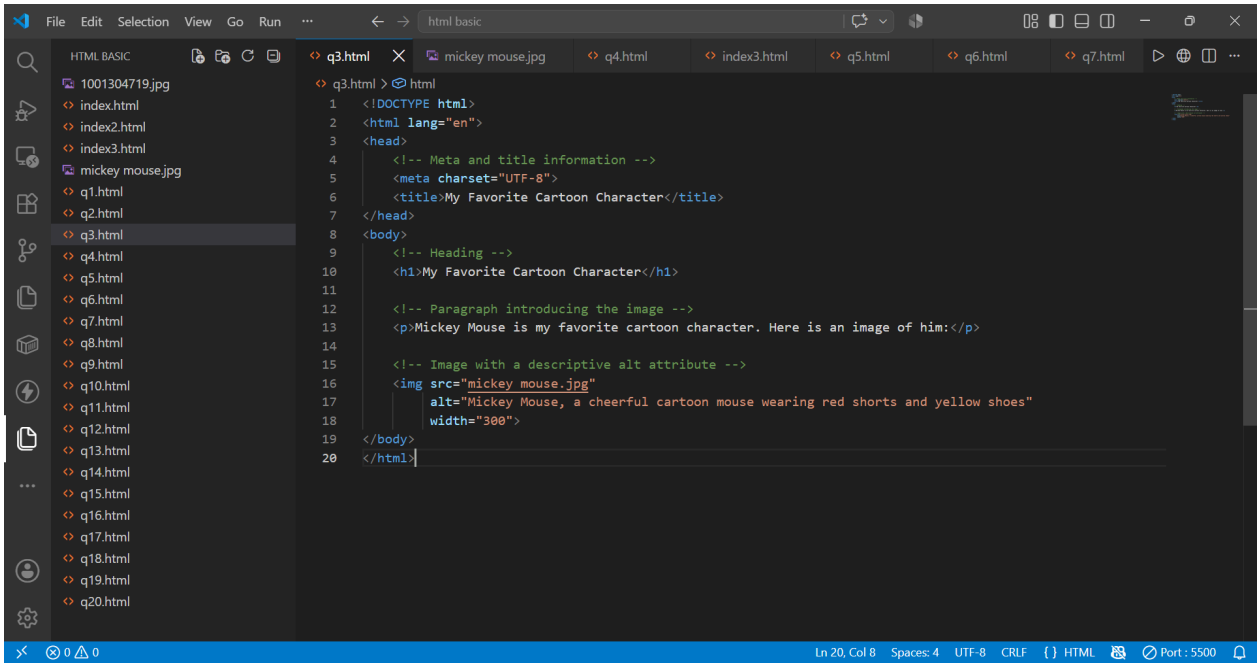

**2.** Add a **hyperlink (`<a>`)** to Google with suitable link text.

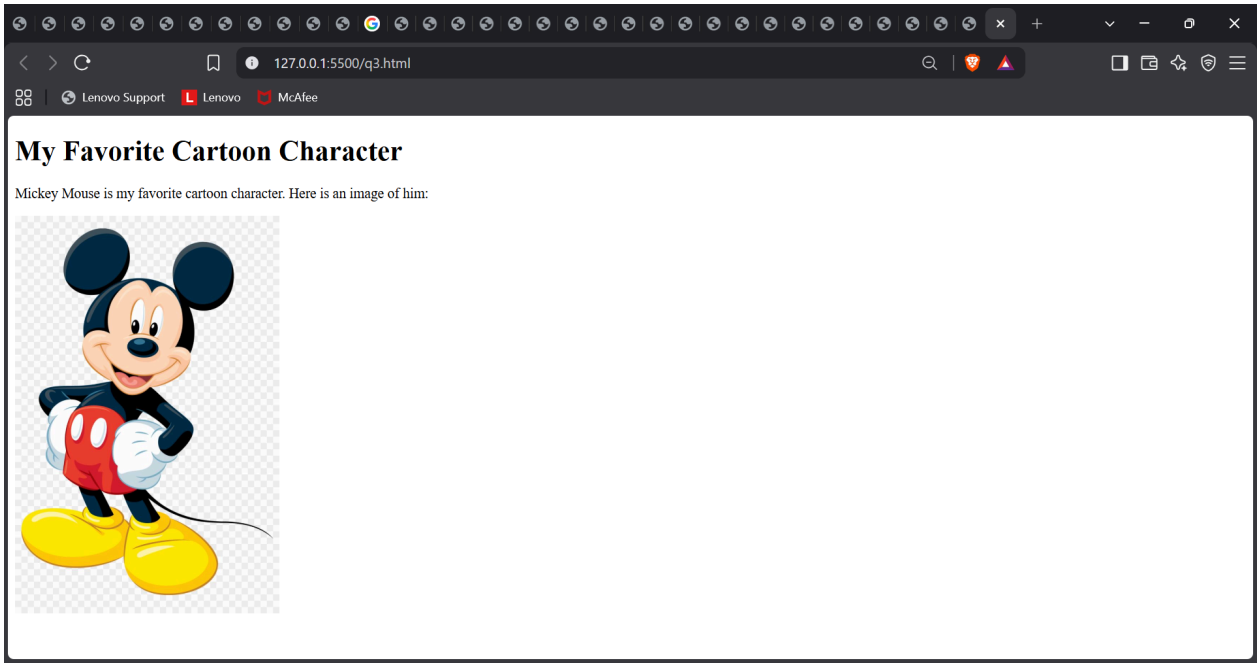

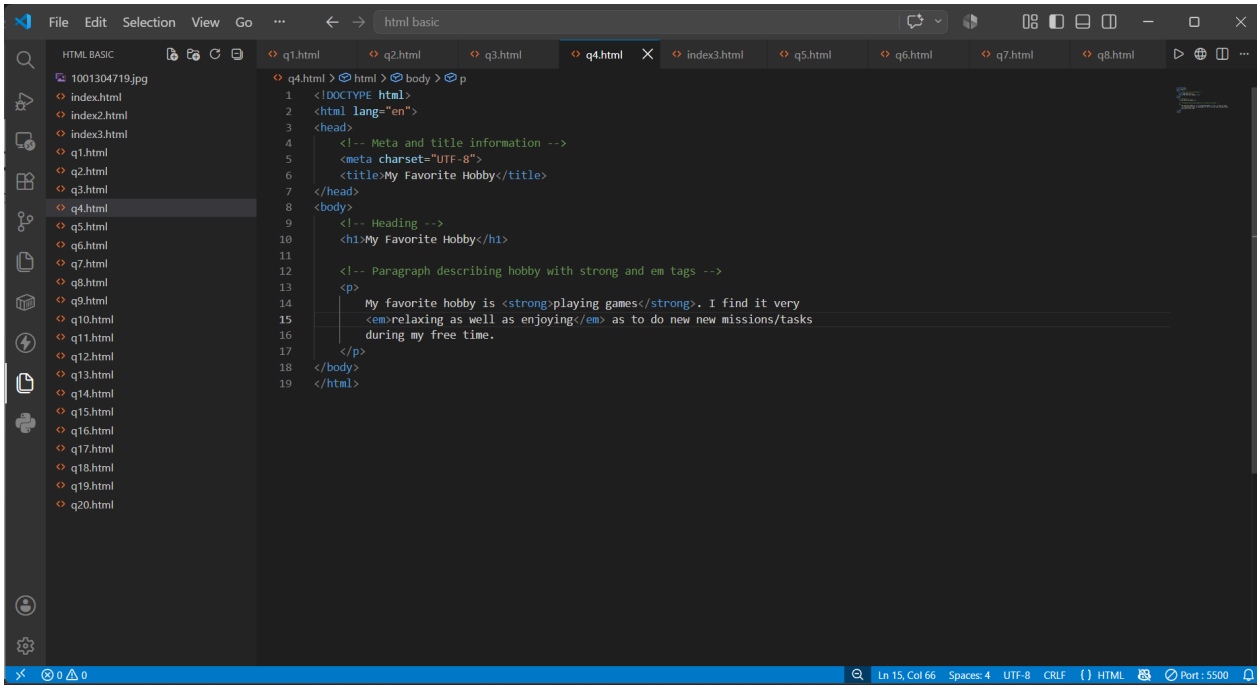

Make sure the link opens in a **new tab**.

**3.** Insert an **image (`<img>`)** of your favorite cartoon or animated character.
Include an **alt attribute** that clearly describes the image.

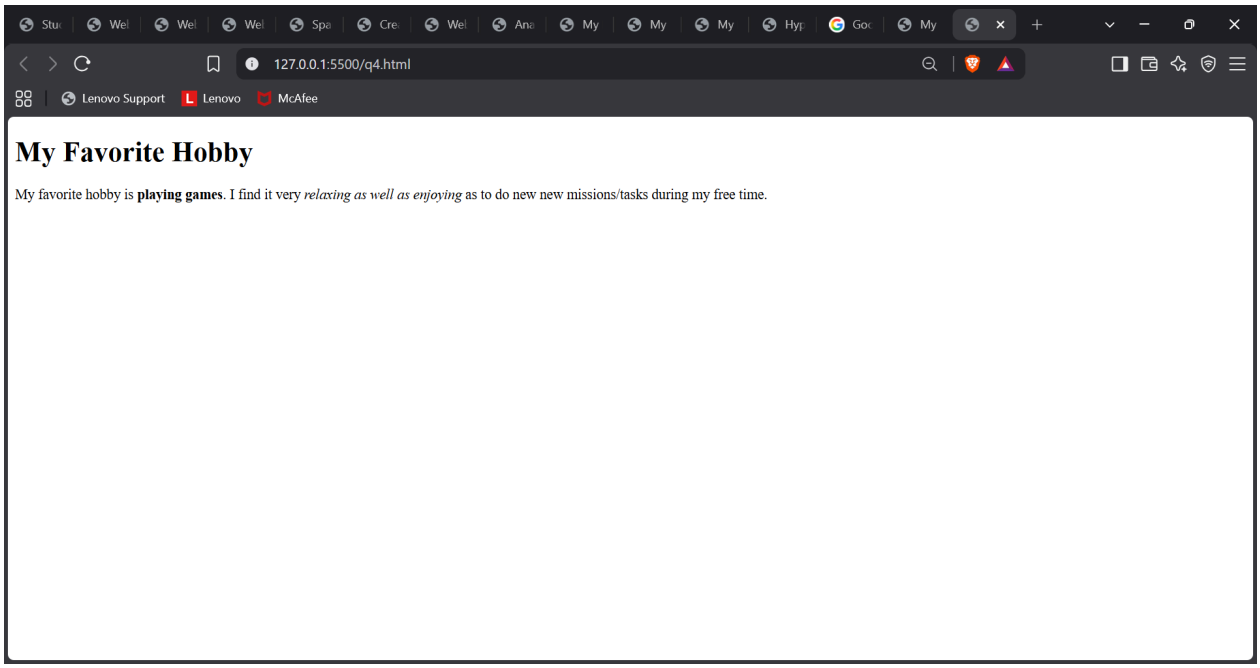

**4.** Write a paragraph describing your **favorite hobby**.
Use `<strong>` to make one important word bold and `<em>` to make another italic.

My Favorite Hobby
My favorite hobby is playing games. I find it very relaxing as well as enjoying as to do new new missions/tasks during my free time.

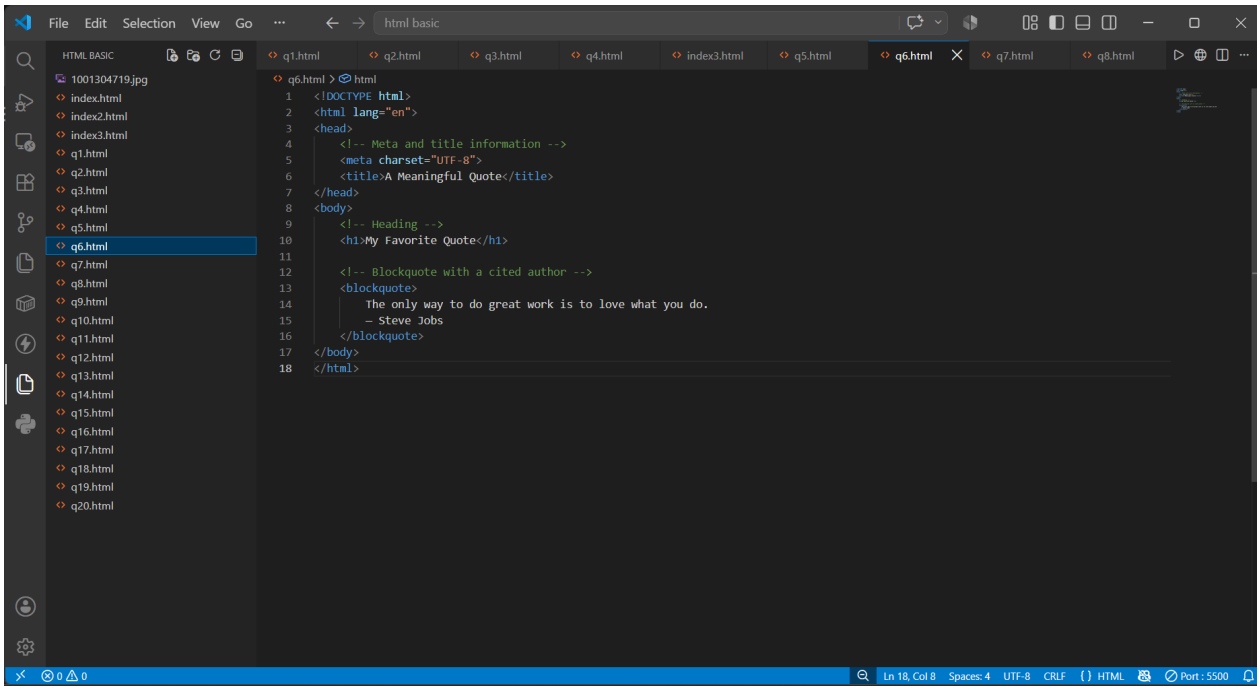

**5.** Create a paragraph with two sentences, but separate them using a **line break tag(`<br>`)**

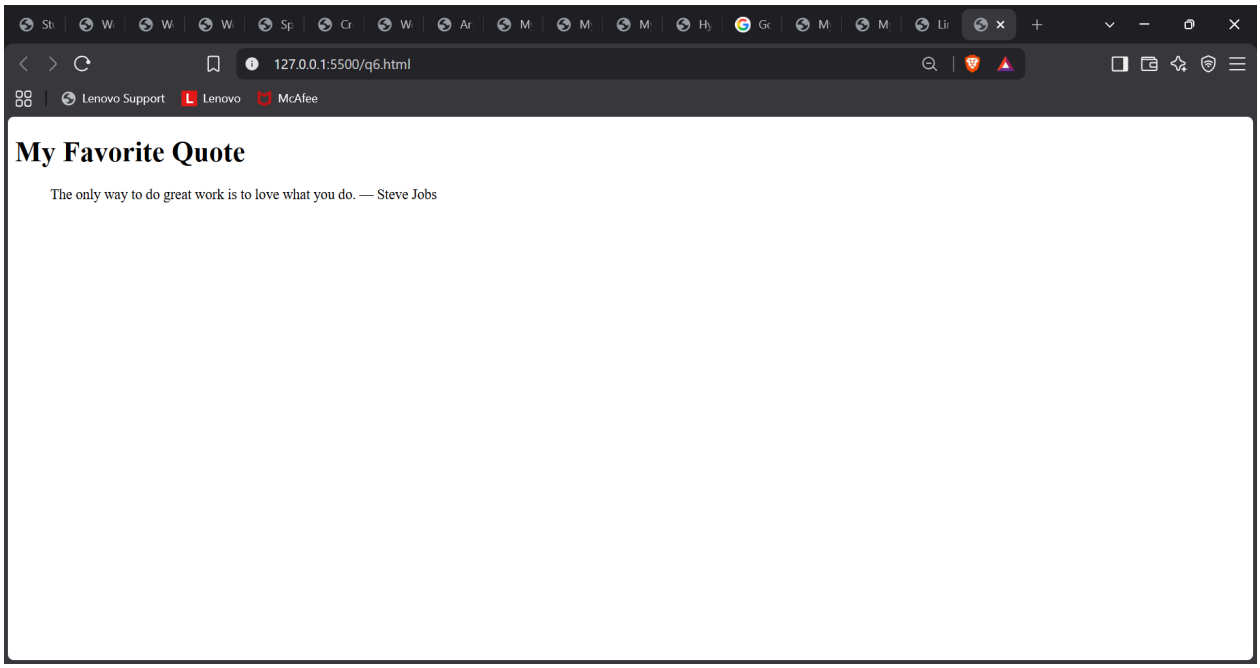

**6.** Use the `<blockquote>` tag to display a meaningful quote and mention the **author's name**

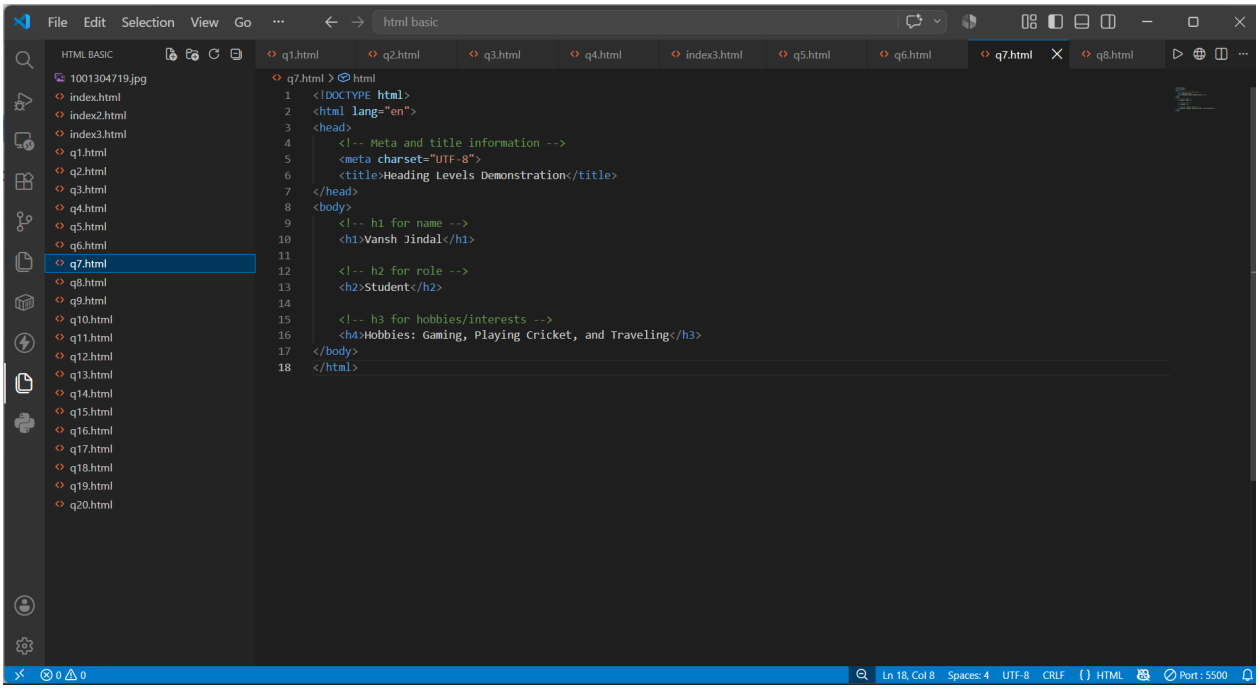

using `<cite>`.

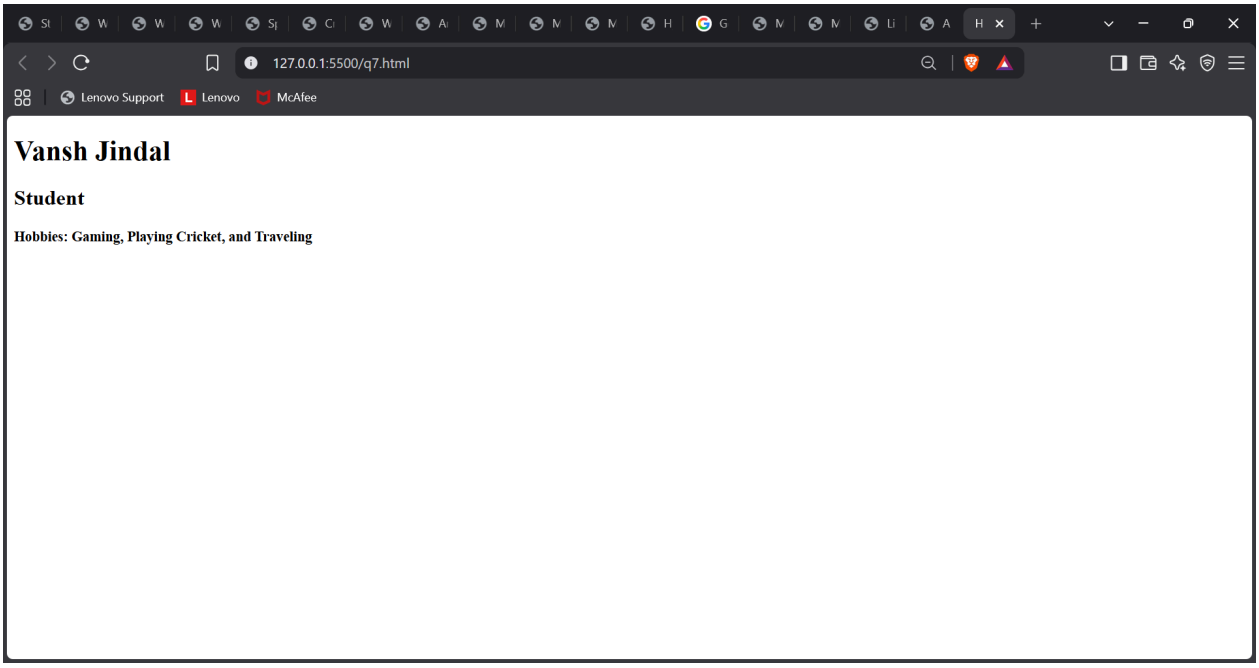

**7.** Demonstrate different heading levels by adding:

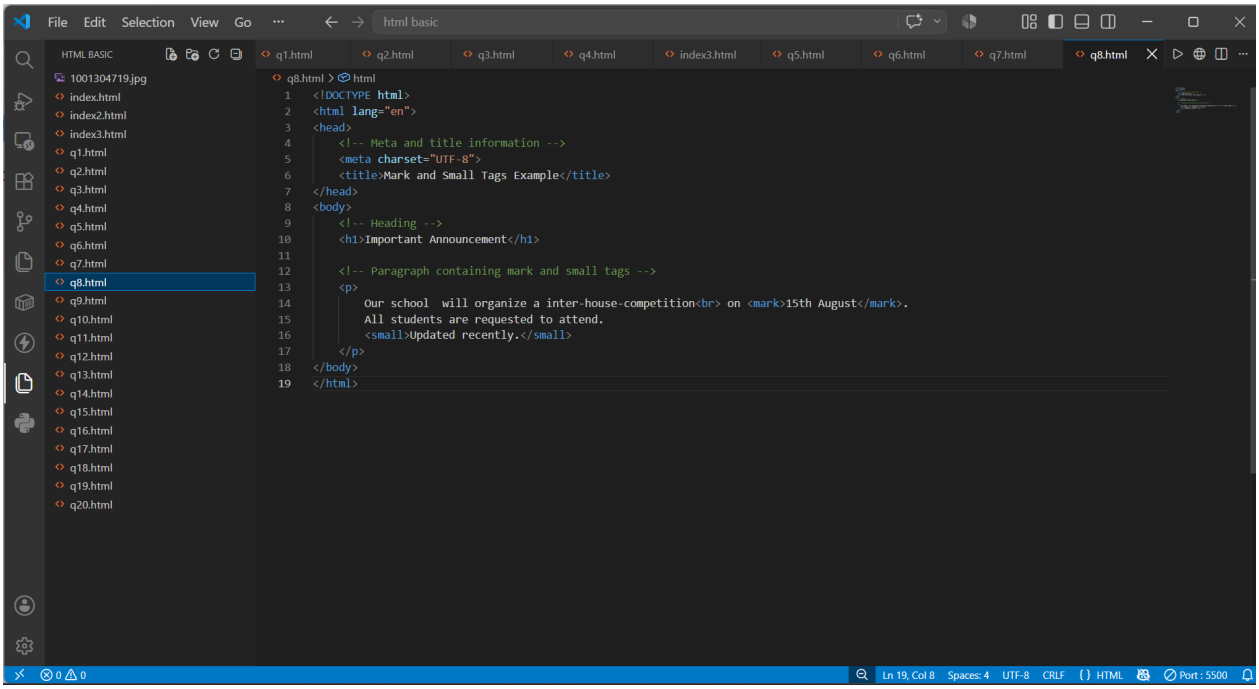

- `<h1>` for your name,
- `<h2>` for your role (student/profession),
- `<h3>` for your hobbies or interests.

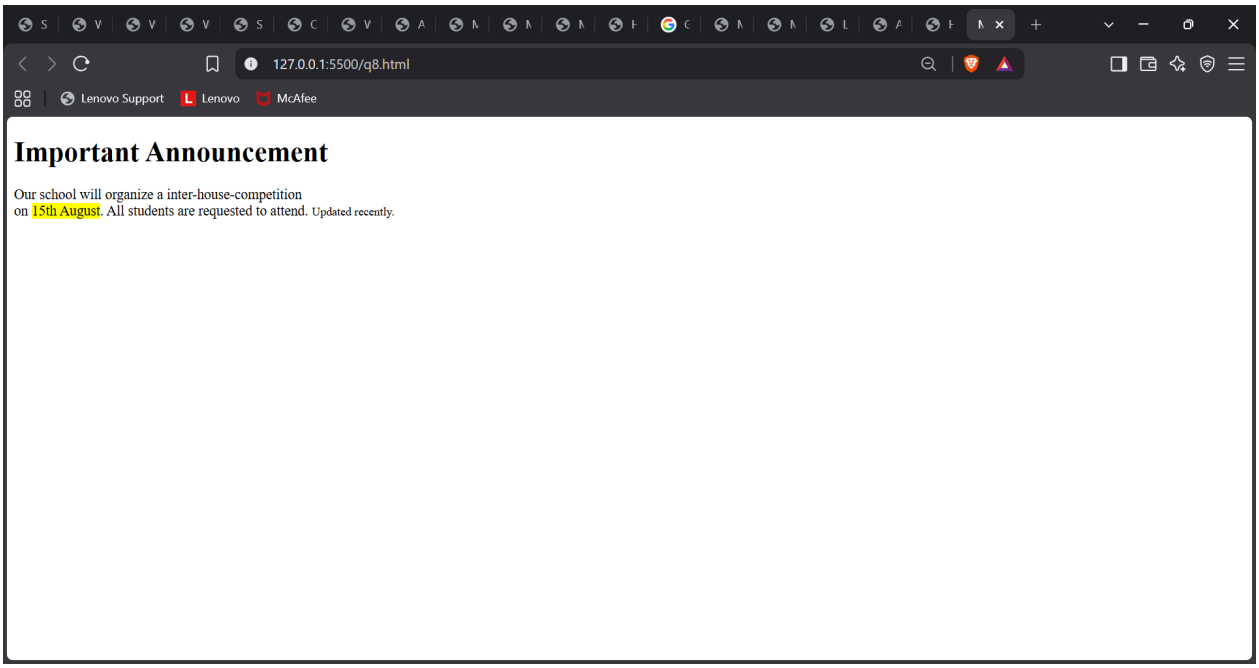

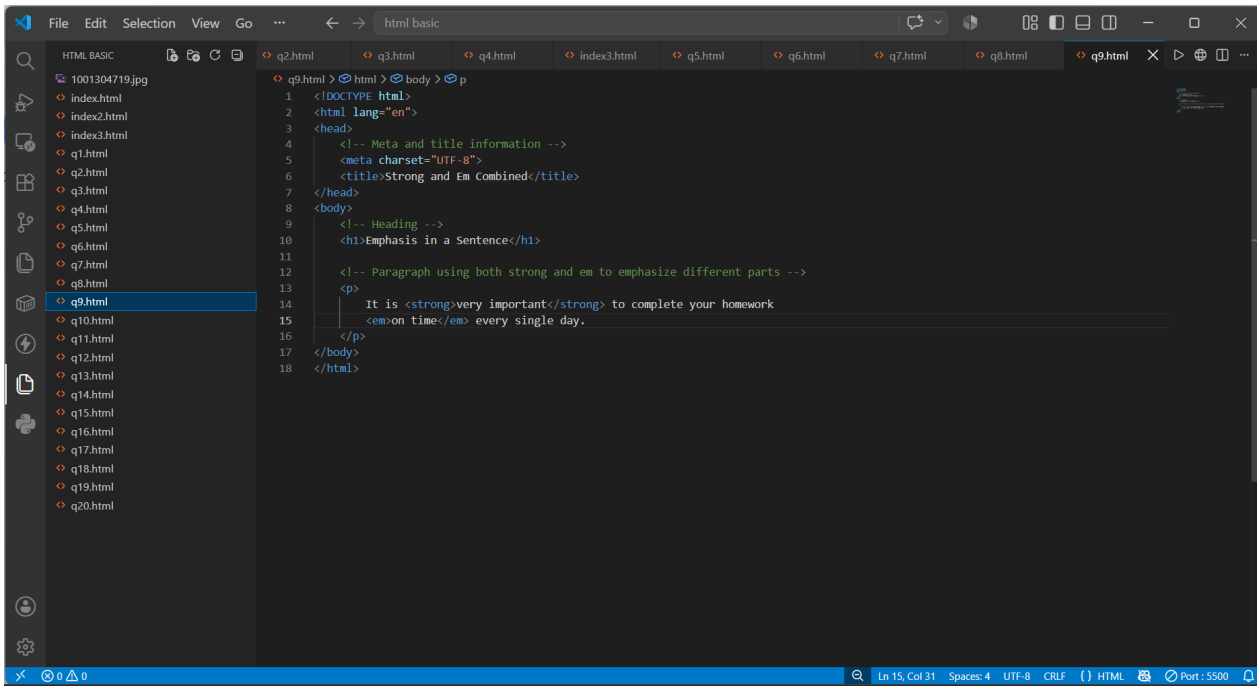

**8.** Write a paragraph containing:

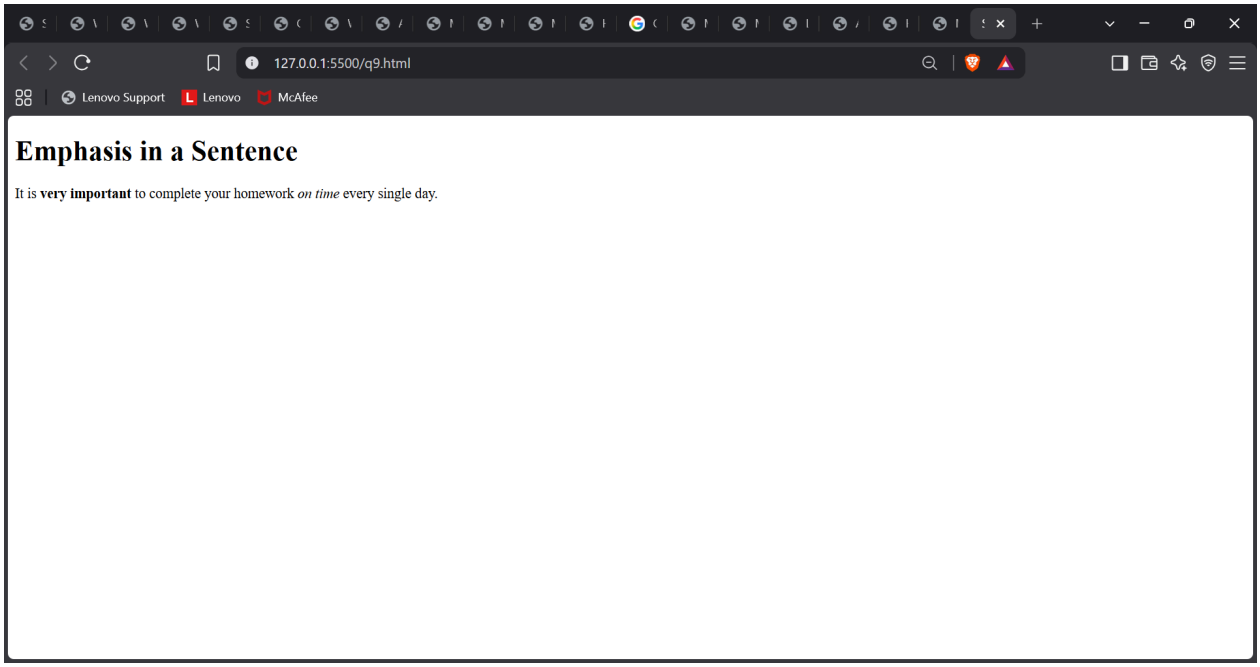

- A **highlighted word** using `<mark>`
- A **small note** at the end using `<small>` (e.g., “Updated recently”).

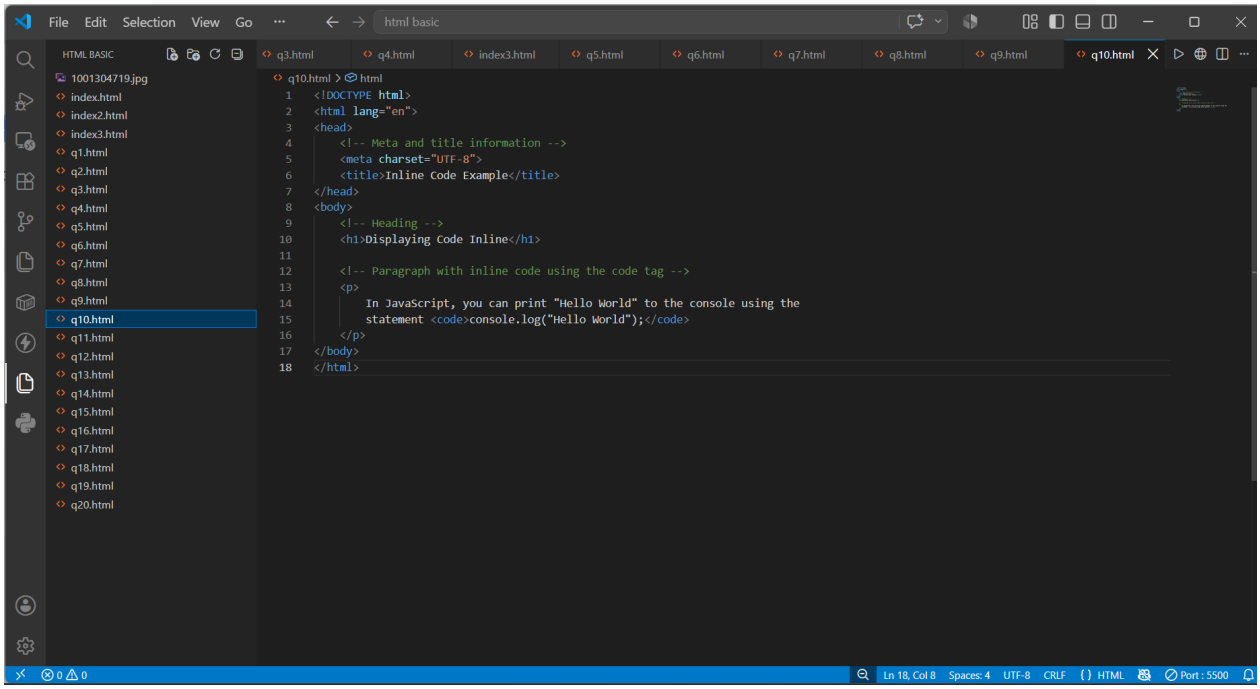

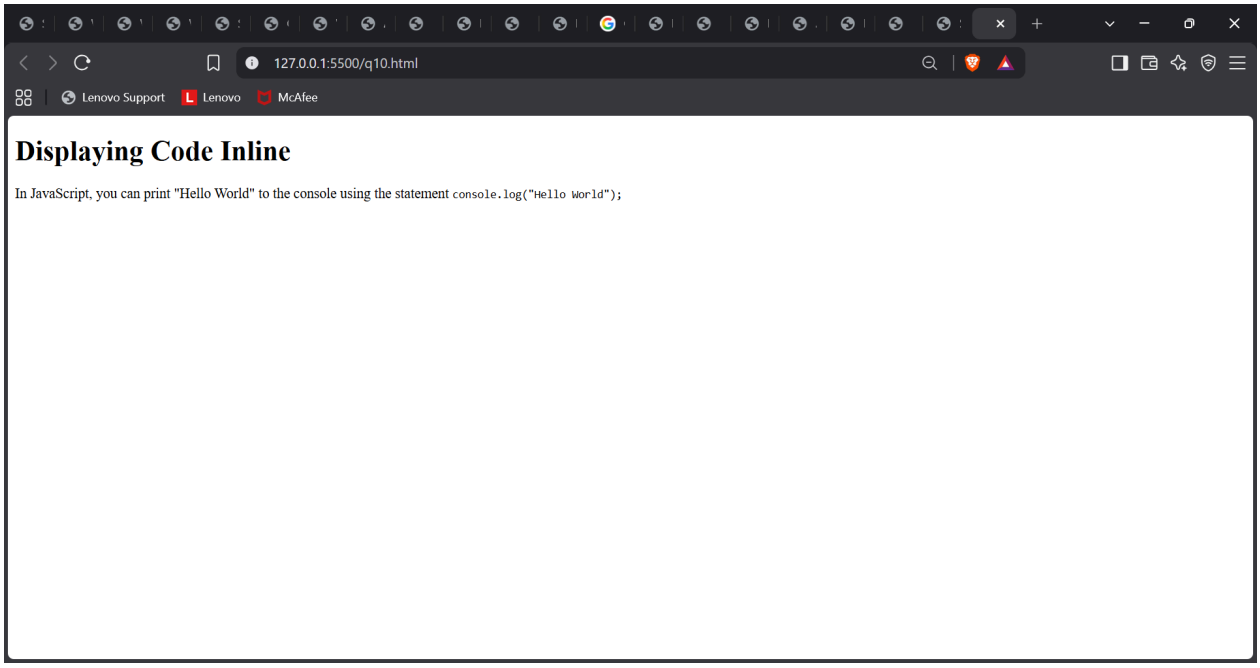

**9.** Create a paragraph that uses both `<strong>` and `<em>` to emphasize different parts of a sentence.

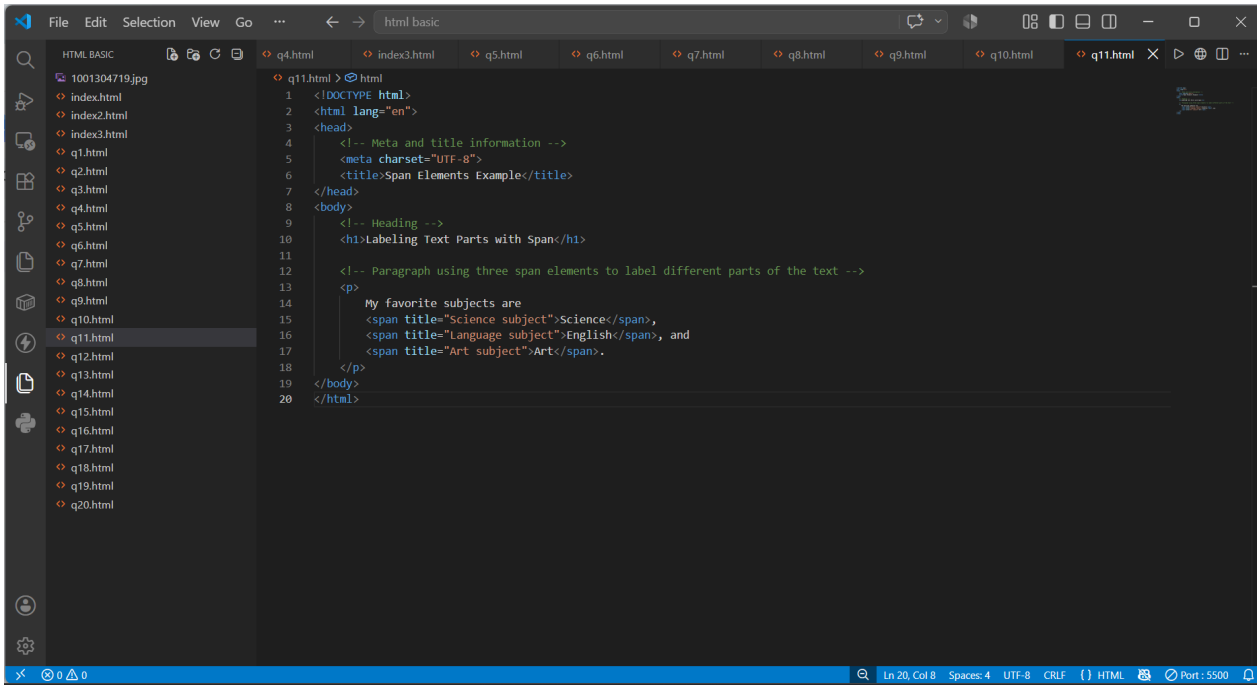

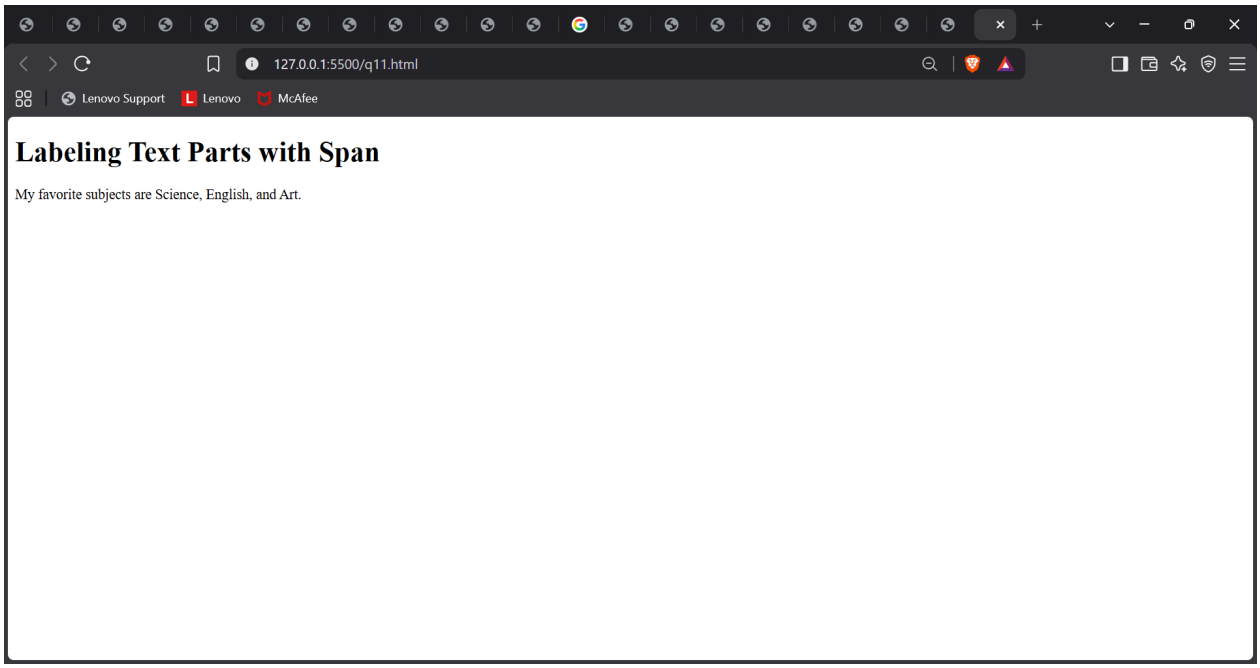

**10.** Display a line of **inline code** inside a paragraph using the `<code>` tag. Example: show how to print “Hello World” in JavaScript.

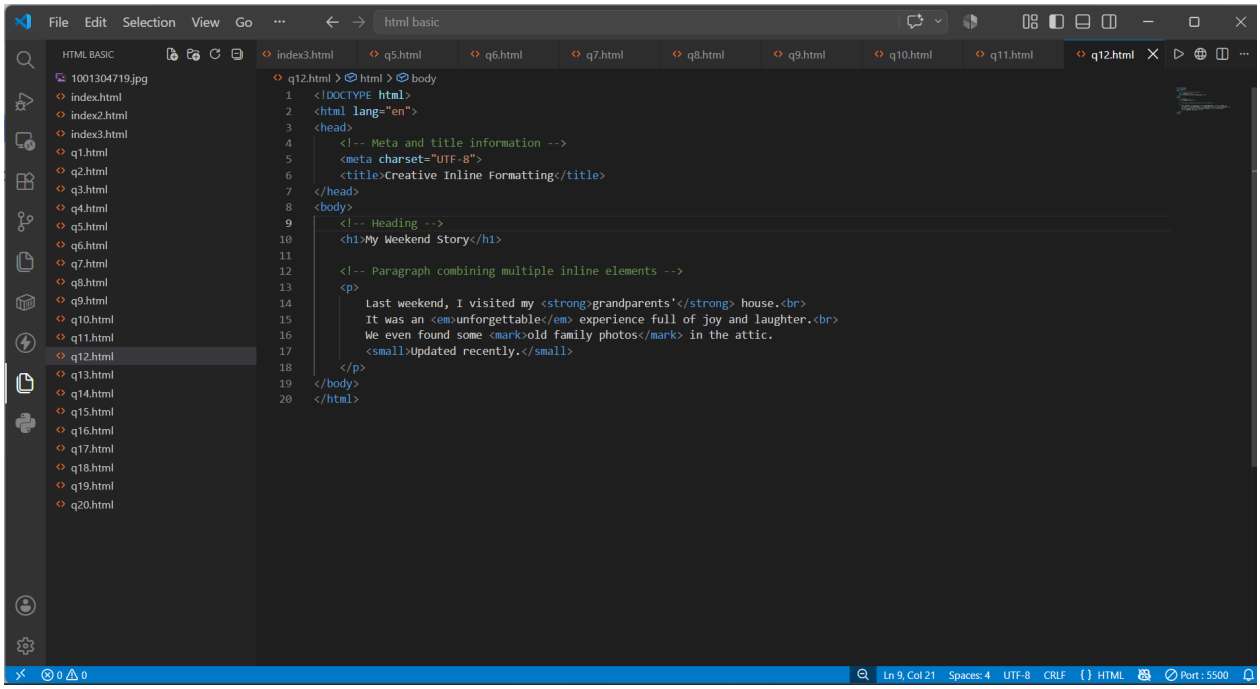

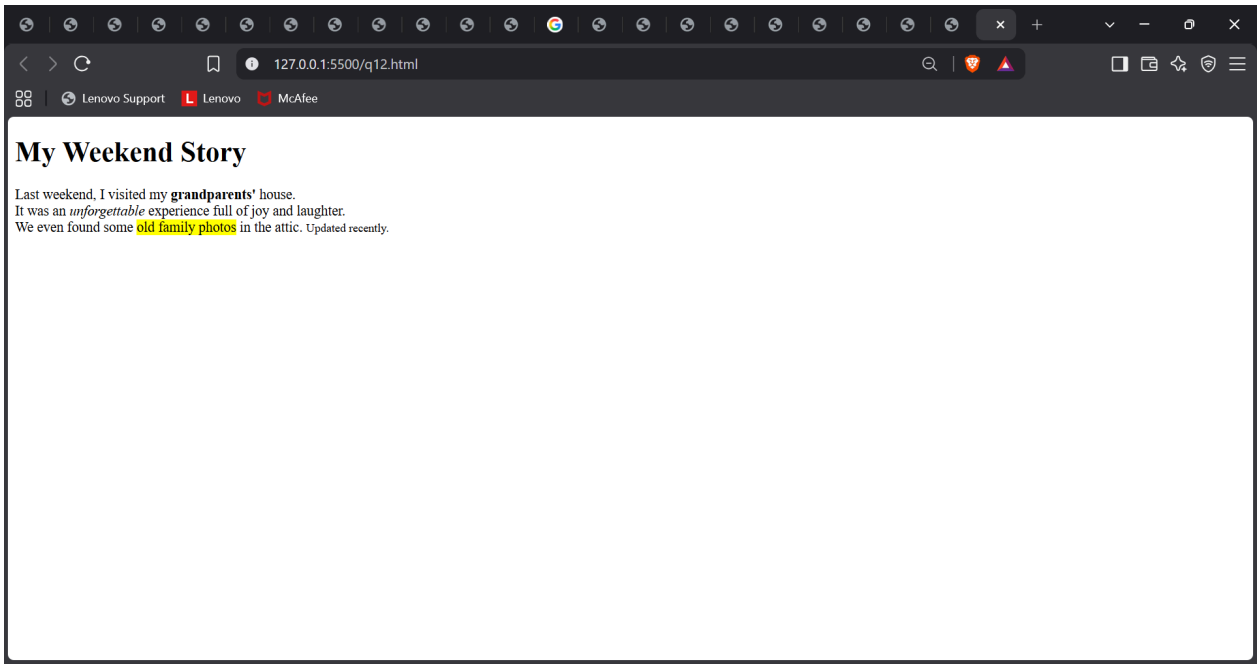

**11.** Write a paragraph that contains **three** `<span>` **elements** — use them to highlight or label different parts of the text (you can imagine colors or meanings).

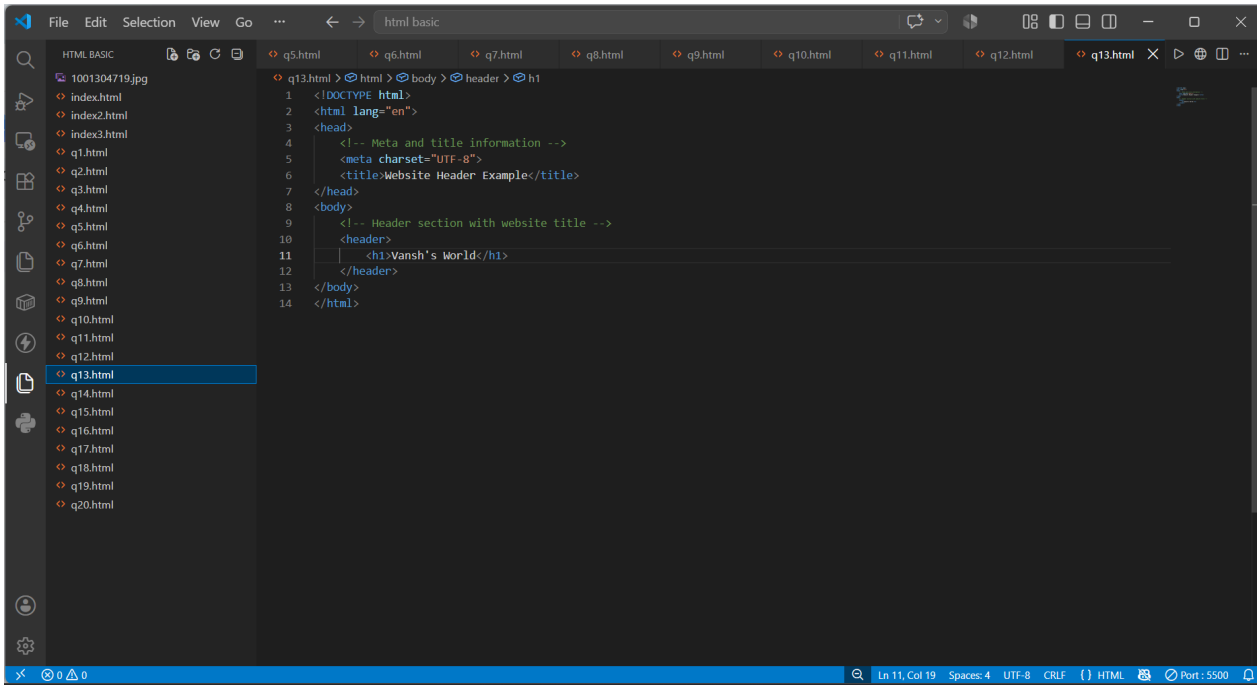

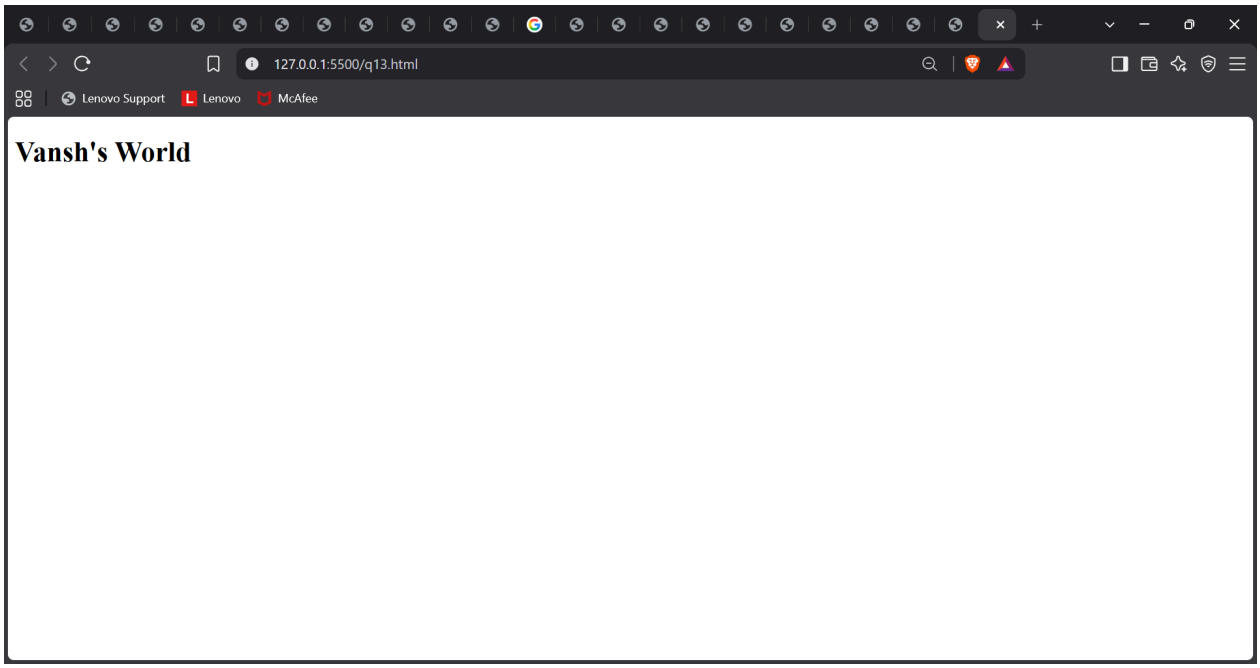

**12.** Create a creative paragraph combining multiple inline elements (`<strong>`, `<em>`, `<mark>`, `<small>`, `<br>`) to demonstrate inline formatting.

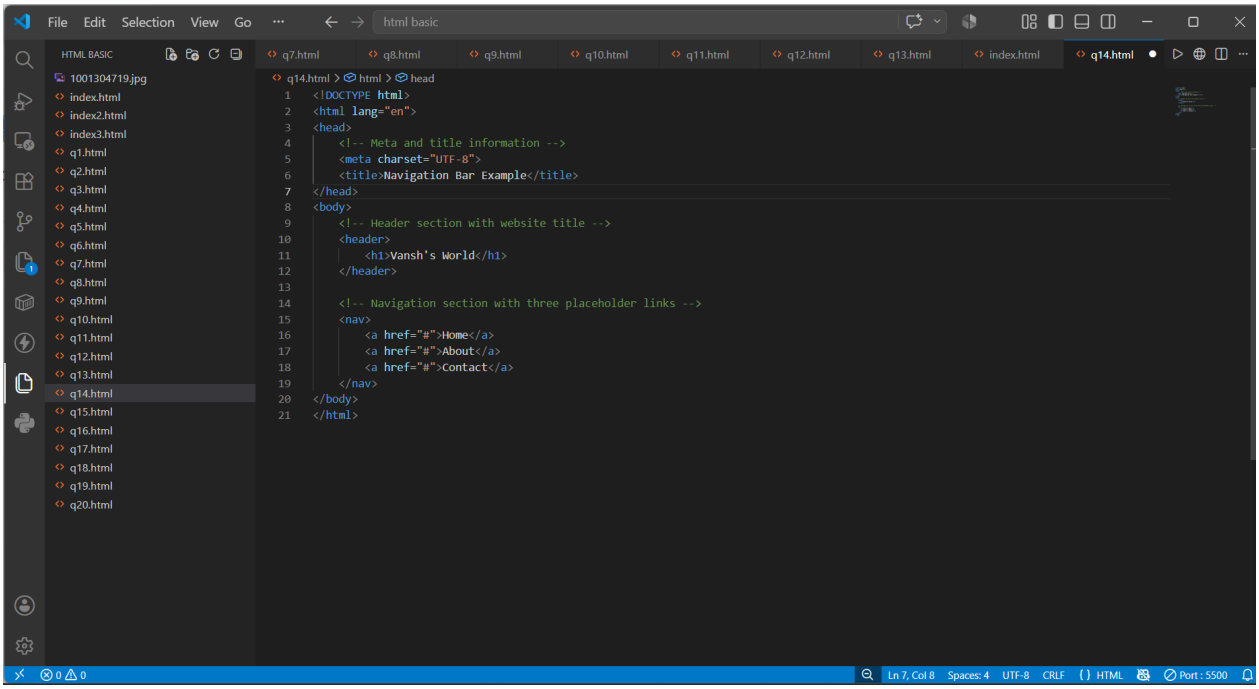

**13.** Build a small webpage with a `<header>` section that displays your website name or title using an `<h1>` tag.

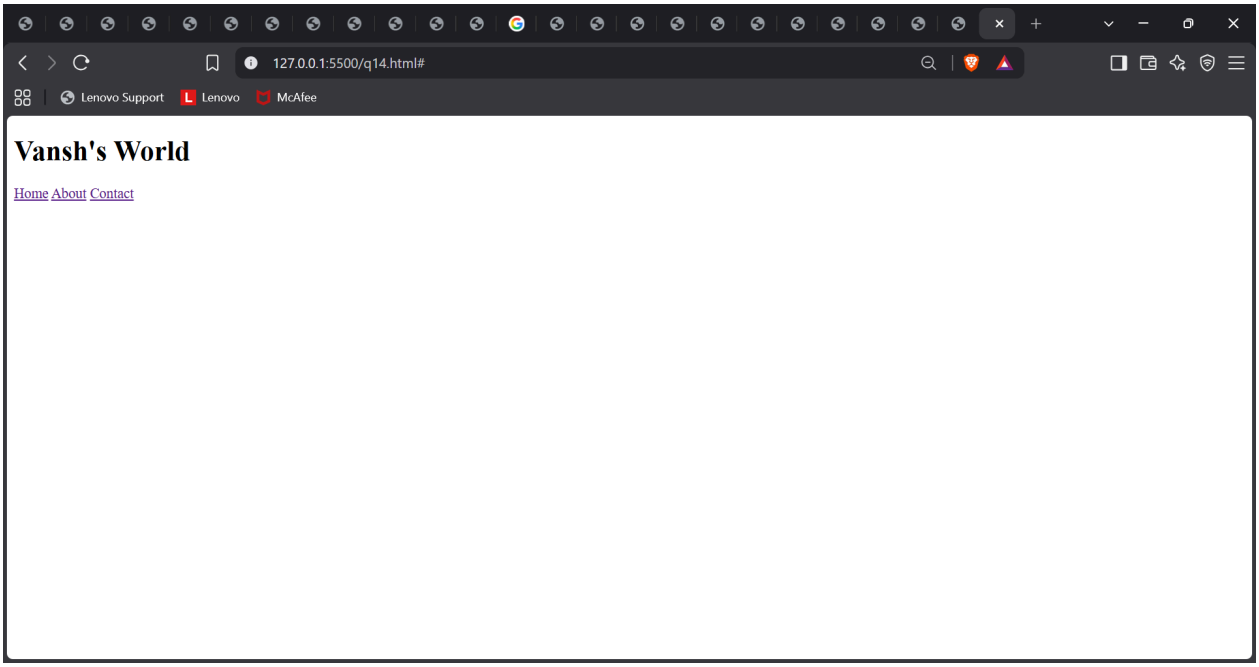

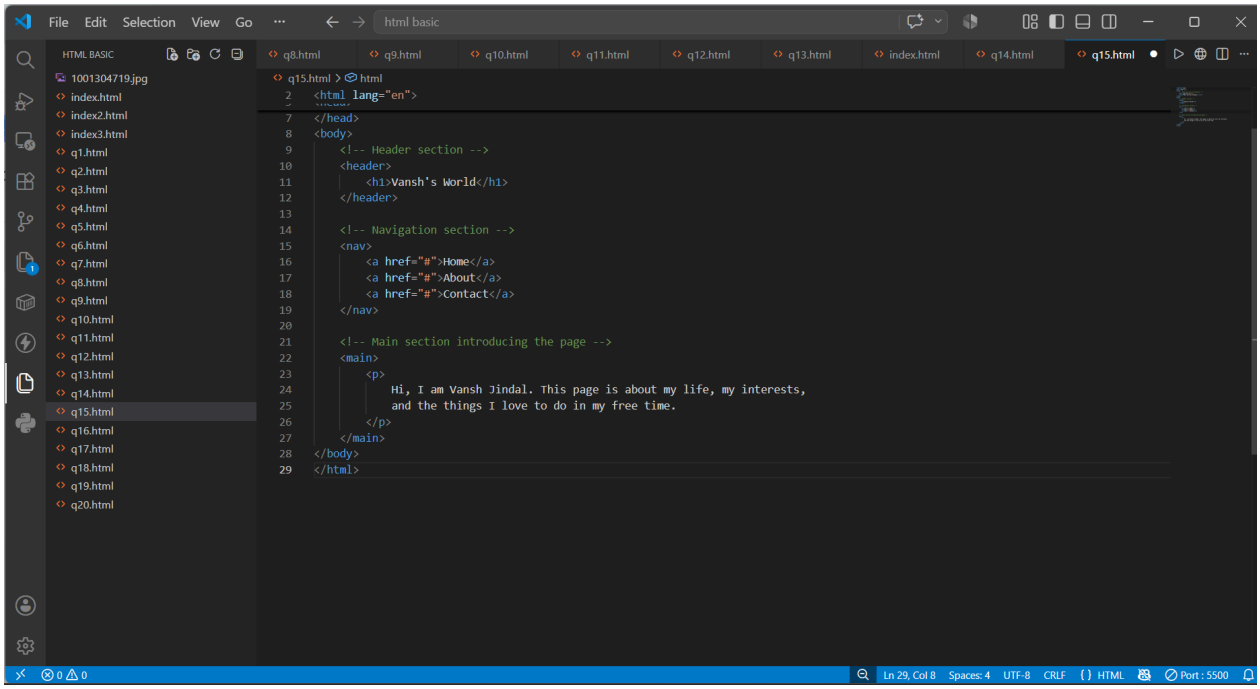

**14.** Just below the header, create a `<nav>` section containing three links — **Home**, **About**, and **Contact**.

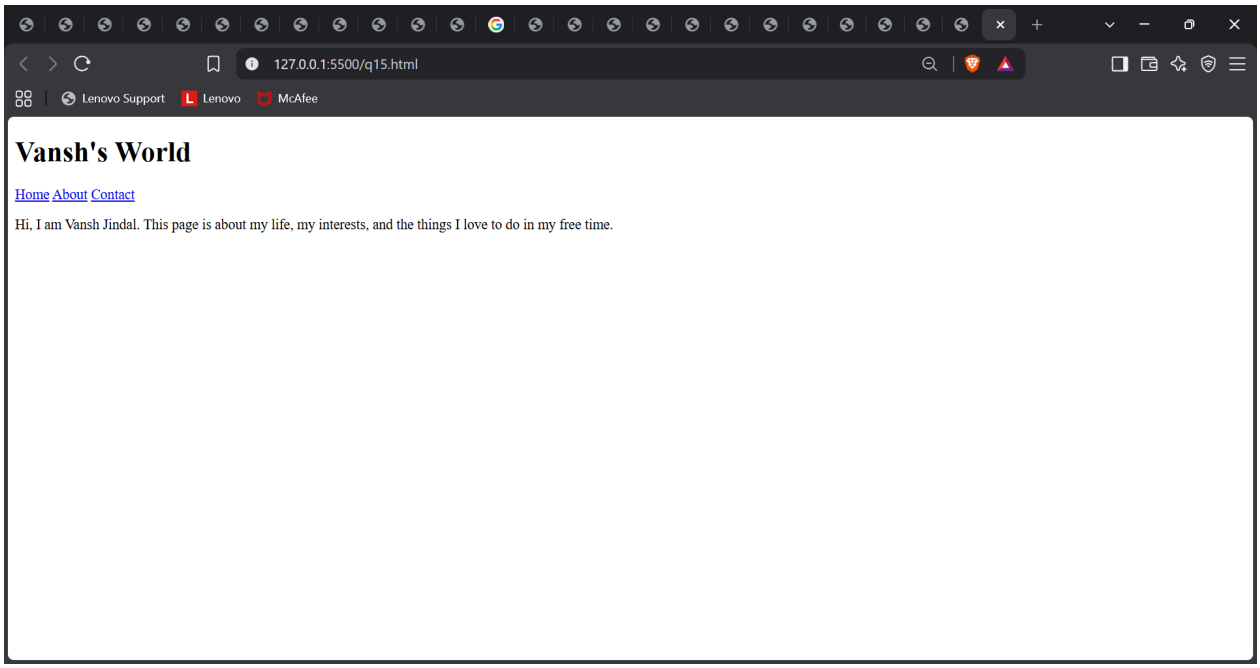

Links can use # as placeholders.

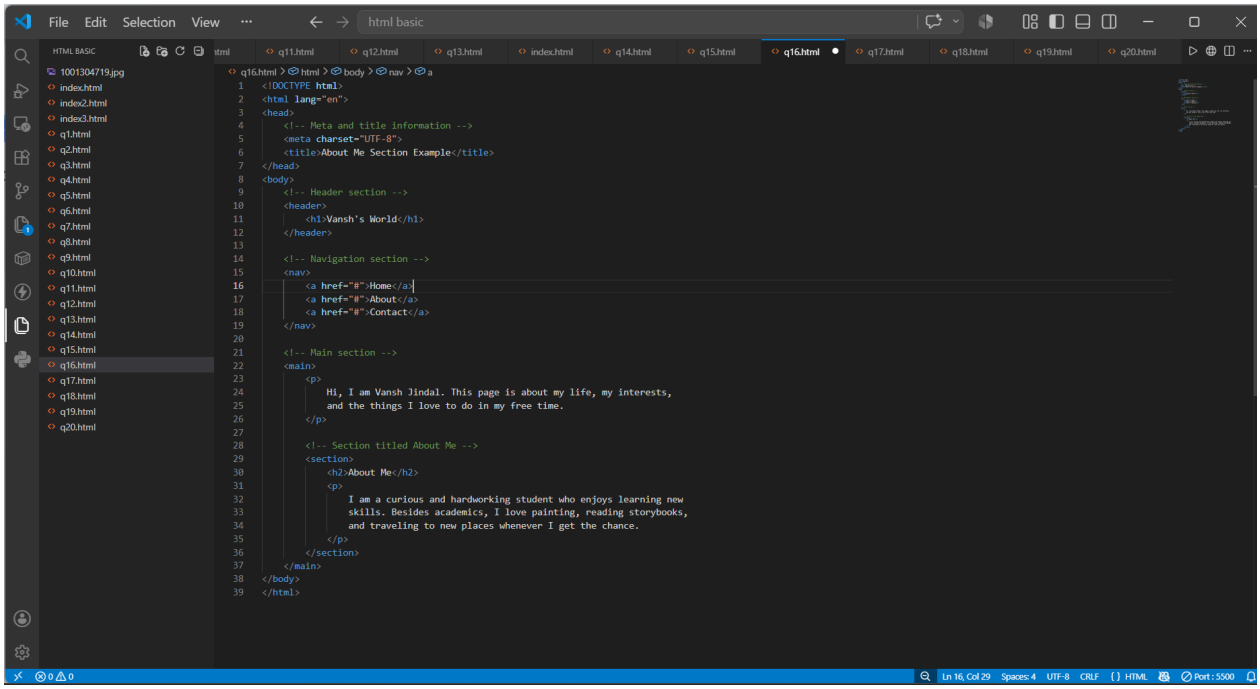

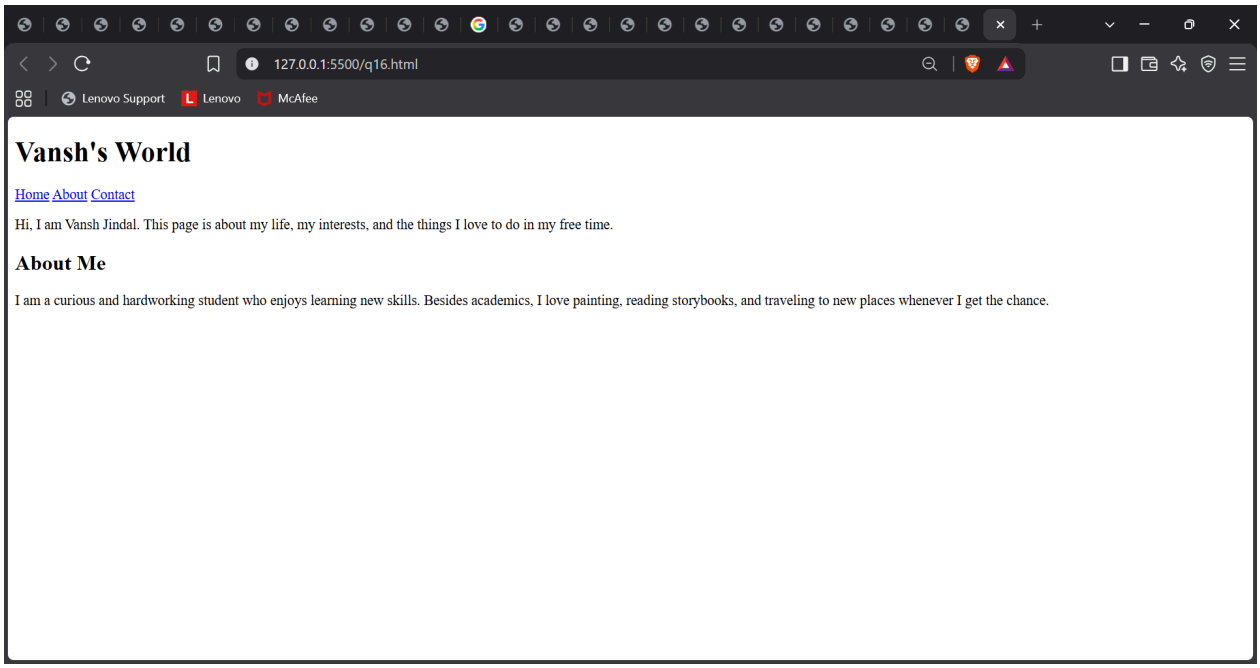

**15.** Create a `<main>` section containing one short paragraph introducing who you are and what the page is about.

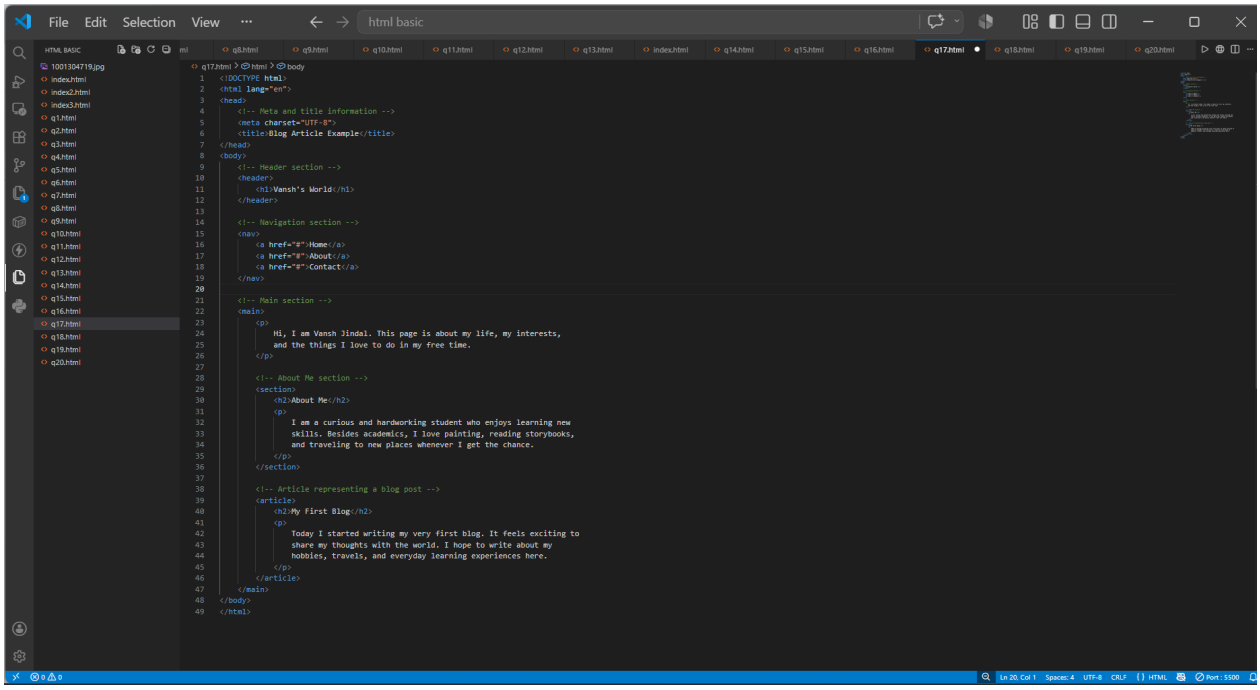

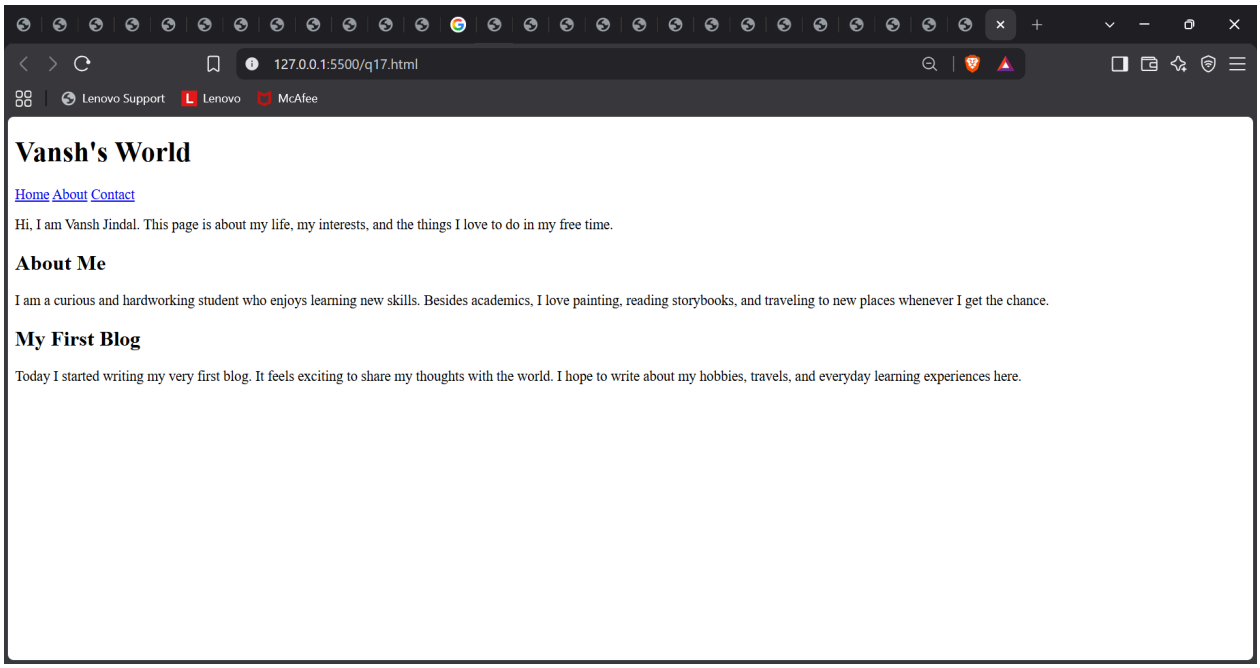

**16.** Inside `<main>`, create a `<section>` titled **About Me**, with one descriptive paragraph.

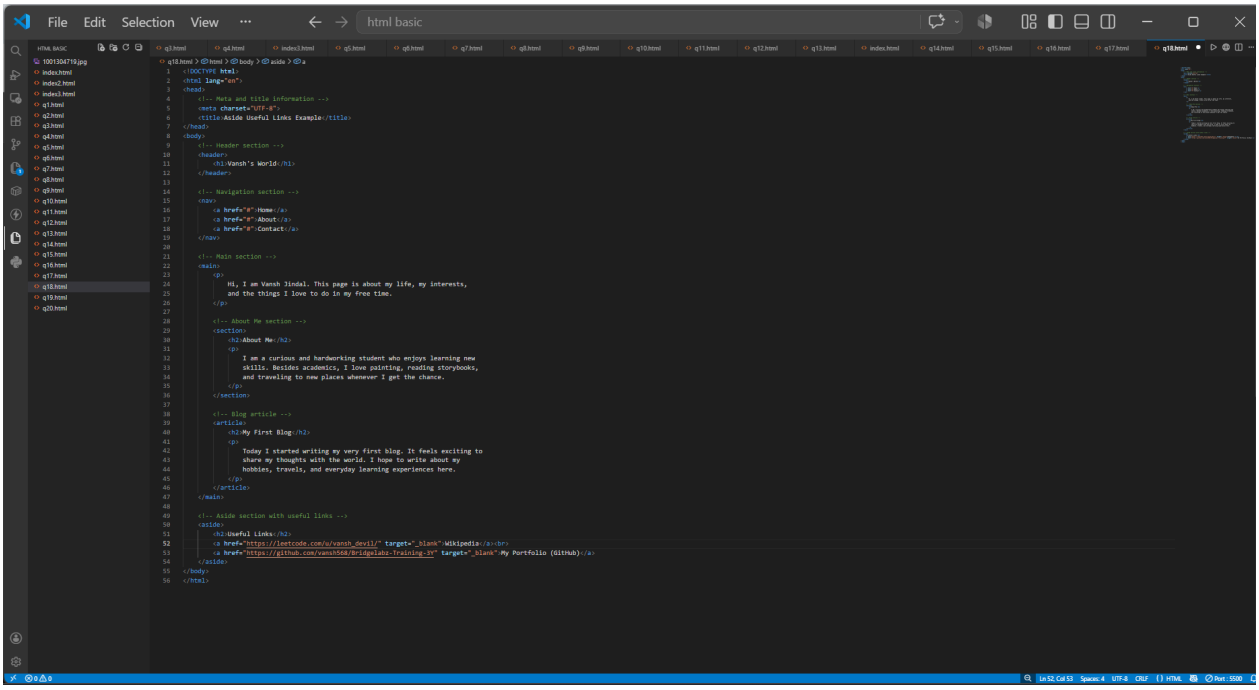

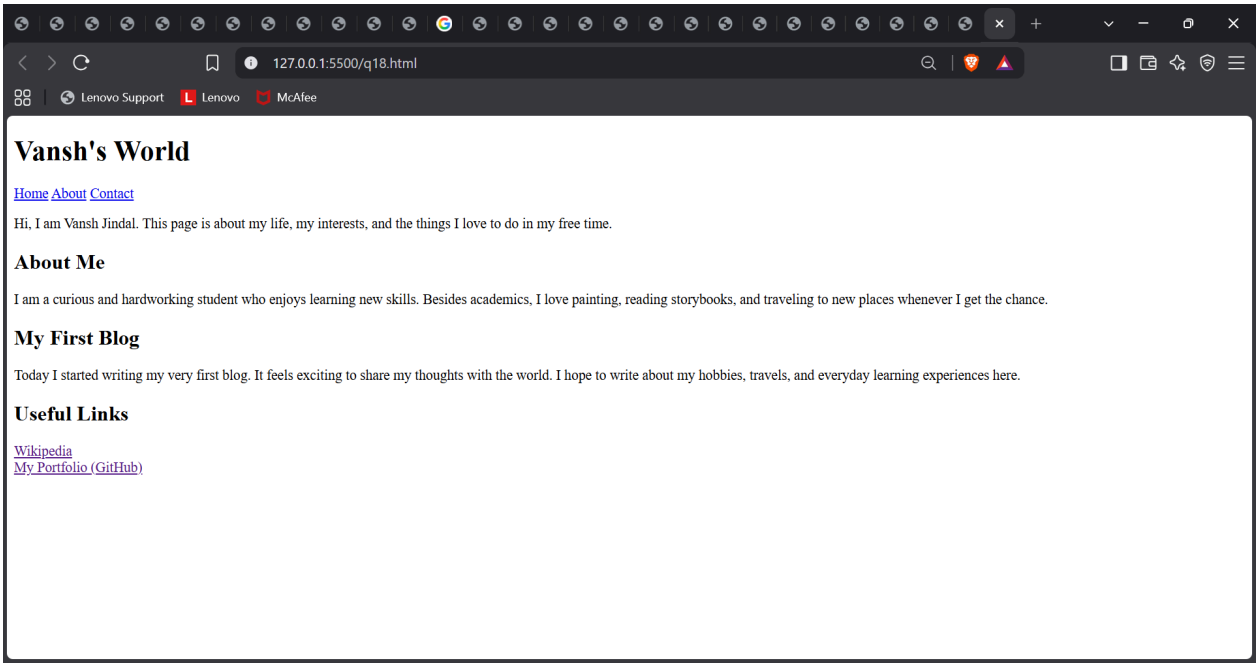

**17.** Still inside `<main>`, add an `<article>` with a heading **“My First Blog”** and a short blog-style paragraph.

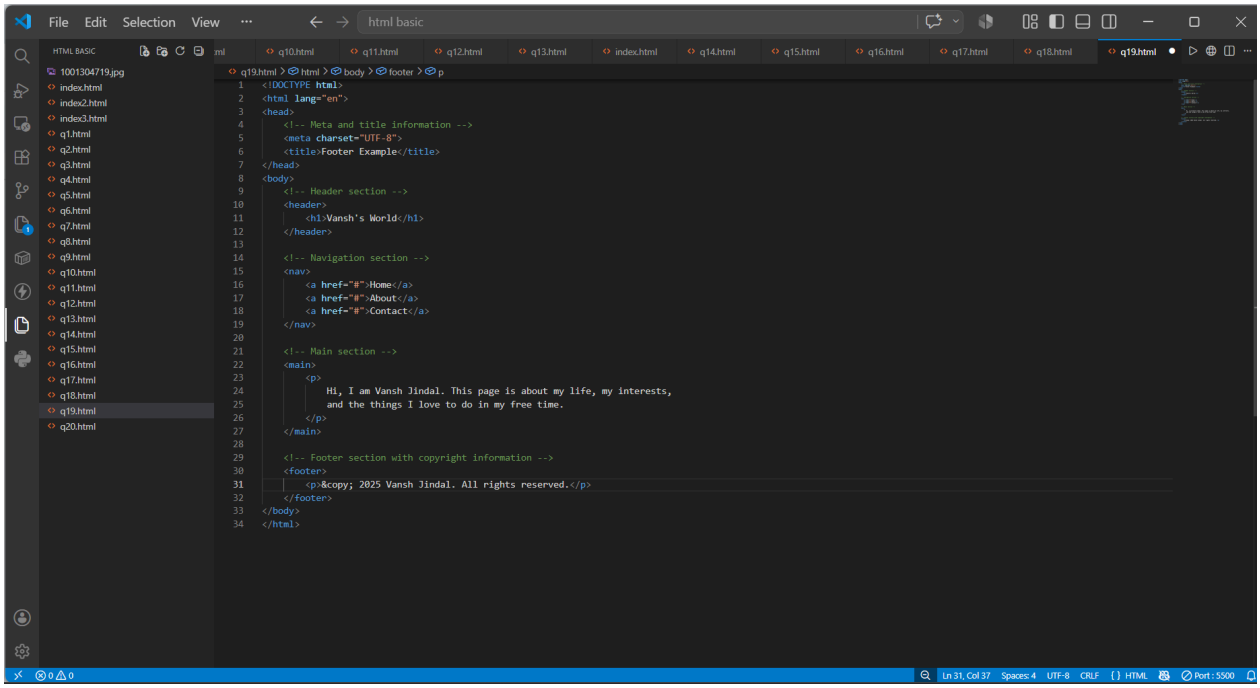

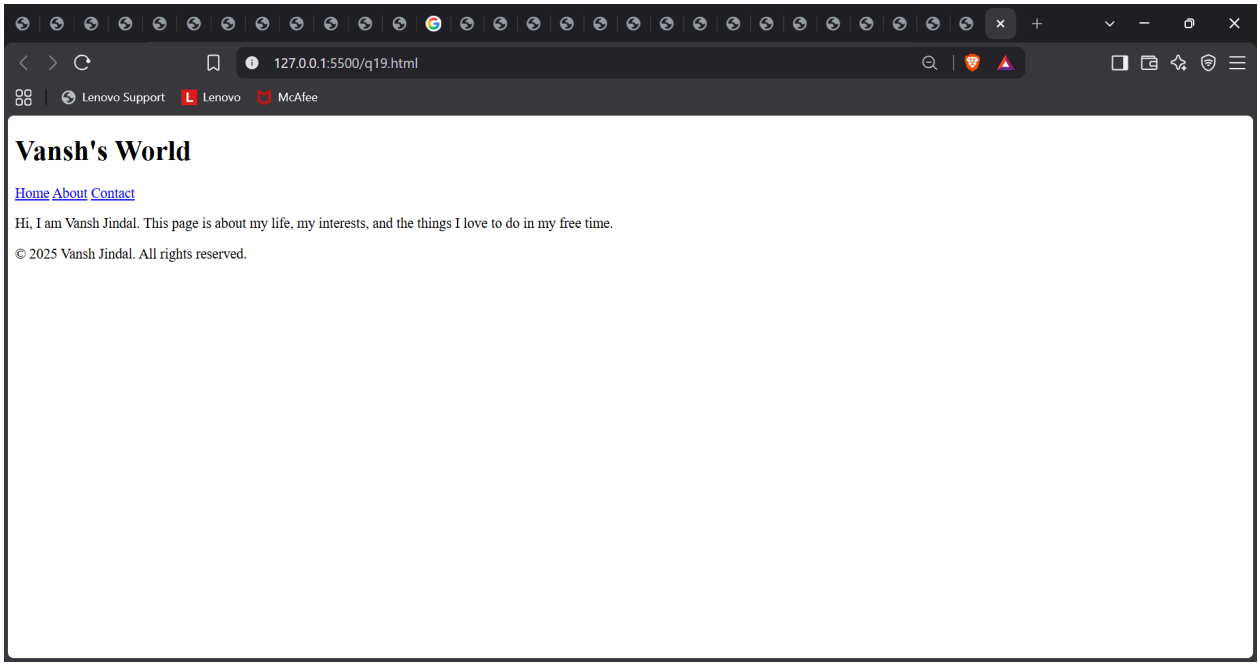

**18.** Add an `<aside>` element titled **“Useful Links”**.
Inside it, include one or two hyperlinks (for example, your portfolio or favorite websites).

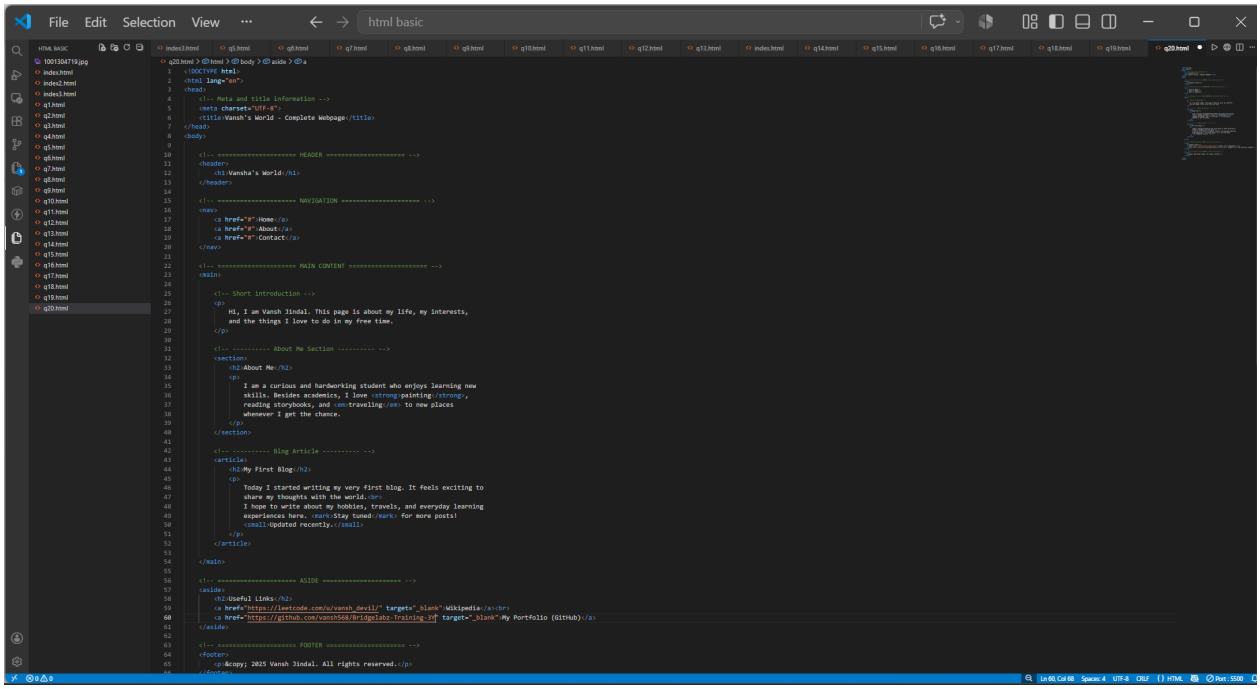

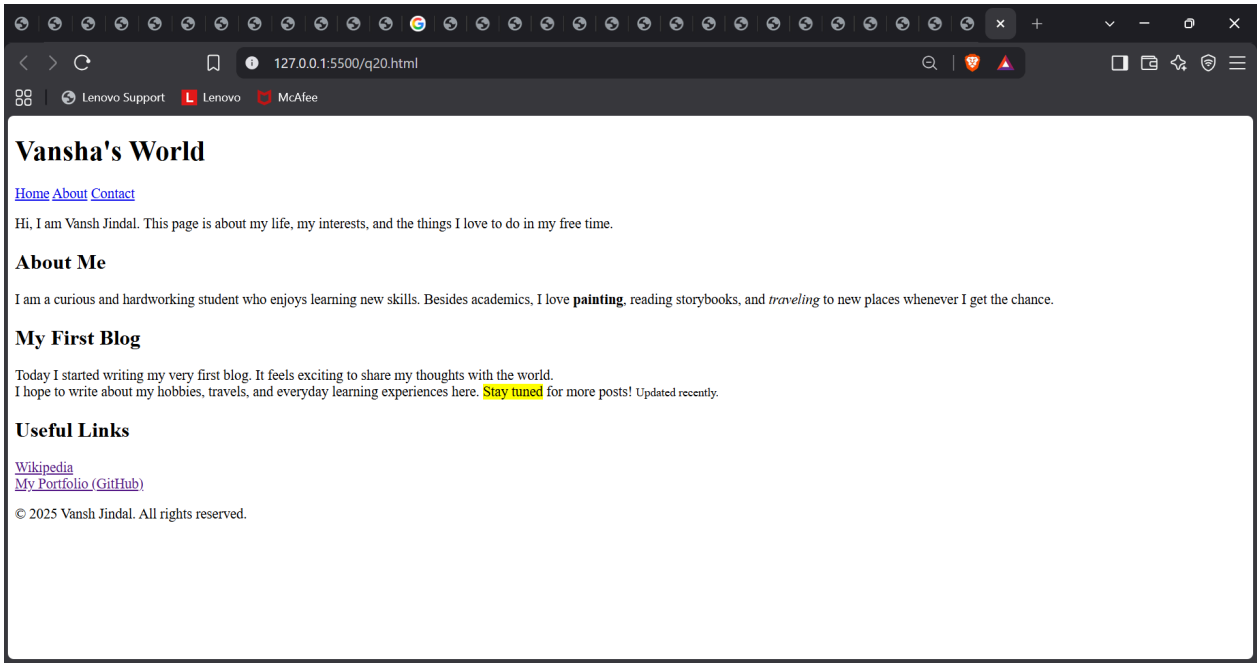

**19.** At the bottom of the page, create a `<footer>` that includes copyright information (e.g., `© 2025 [Your Name]`).

**20.** Combine all the above structure into one complete webpage — use `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<aside>`, and `<footer>`.

# Vansha's World

Home About Contact

Hi, I am Vansh Jindal. This page is about my life, my interests, and the things I love to do in my free time.

## About Me

I am a curious and hardworking student who enjoys learning new skills. Besides academics, I love **painting**, reading storybooks, and *traveling* to new places whenever I get the chance.

## My First Blog

Today I started writing my very first blog. It feels exciting to share my thoughts with the world.
I hope to write about my hobbies, travels, and everyday learning experiences here. Stay tuned for more posts! Updated recently.
